DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/20/10 has been entered.

102 Rejections Withdrawn

The rejection of claims 1-7 and 9-37 under 35 USC 102(b), in so far as they read on the species defined in the previous Office Action, has been overcome by applicant's amendment. The amendment narrows the claim set such that it no longer reads on the cited art.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 15, 26, 28, 32, 35 and 37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear why a proviso

Art Unit: 1621

(proviso 'a') where Y is alkyl is included in the claims. After applicant's latest amendment, Y cannot be alkyl. Thus, the proviso excludes a compound which the claims no longer encompass.

Claims 2-6, 9-14, 17-24, 29-31, 33, 34 and 36 are also rejected under 35 USC 112, second paragraph, as claims which depend from indefinite claims are also indefinite. *Ex parte Cordova*, 10 USPQ 2d 1949, 1952 (PTO Bd. App. 1989).

Allowable Subject Matter

Claim 8, drawn exclusive to the elected species, remains free of the prior art.

Claim Rejections - 35 USC § 102

Applicant having overcome the outstanding rejection, the search was therefore expanded as called for under Markush examination rules, a compound-by-compound search, to include a single additional compound. That compound is defined when, using formula (I) of claim 1: $R=R_1=R_2=H$; $A=C_2$ alkylene; X is $>C=O$; and Y is haloalkyl.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 15, 26, 28, 29 and 32, in so far as they read on the species defined above, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by *Tetrahedron*

Art Unit: 1621

Letters (1993), 34(11), p. 1827-1830 (CAPLUS abstract). The reference teaches applicant's compound: RN=148149-00-2.

For purposes of this Office Action, claims 7, 16, 25, 27 in their entirety and the subject matter of the remaining claims (with the exception of claim 8) is withdrawn as being drawn to non-elected subject matter.
